

## Towards the European Parliament Elections

The European Union is at a crossroads. On one side are nationalisms, divisions, selfishness, walls. On the other equality of rights and duties among all European citizens.

The idea of the **Republic of Europe** has inspired us to promote a change, to involve citizens and create a **federal and democratic Europe, able to guarantee equal rights and duties to all citizens.**

Thanks to the **Eu.Re.Ca. project** we engaged European citizens in places where public and private discourse meet: in the cafés. All over Europe we involved: **18 cafés, 7 NGO, hundreds of citizens.**

During our meetings with the citizens we talked about peace, war, politics, health, migration, financial and climate crisis. We tried to **promote civic participation** debating on the idea of the Republic of Europe, but also facing what happened in past months in Europe and at the European borders. The debates with European citizens about the dramatic situation in Ukraine have reinforced our belief that we need a European Union more committed to democracy, peace and justice.

For these reasons, our commitment will go on after the end of the project.

**In 2024 the elections of the European Parliament will take place:** this could be a chance for a concrete and effective change. These 18 cafés, and the future ones, will continue to debate with citizens on the future of Europe. They will be the places where we can collectively promote this change in the European Union.

Look forward the European Parliament elections with us!
